

Press Release, Linköping 2005-03-10

Agama presents RIA 2.1

Agama Technologies AB today announces RIA 2.1, the new version of Agamas leading IP-TV monitoring solution.

RIA 2.1 offers a complete real time 24/7 monitoring solution for IP-TV, focused on experienced quality from a viewer perspective. RIA 2.1 can analyze MPEG-2 (MP@ML) and has support for HD TV (using MPEG-2 MP@HL). RIA 2.1 can accept transport streams over RTP or over UDP.

New for this version is also support for the AVC video format.

Using this analysis, RIA 2.1 can be used for a number of quality assuring measures including Confidence monitoring of IP-TV network and Service Level Agreement verification. RIA helps customer service to provide timely and correct answers as well as giving network operations an efficient tool for keeping the IP-TV service up and running.

Agama RIA 2.1 will be available for demonstration at CeBIT 2005, where Agama will be exhibiting in Hall 9, stand B59.

About Agama

Agama Technologies AB is devoted to be the leading provider of products and services enabling high quality digital distribution of media over IP networks. The Agama RIA product line is a software solution for real time monitoring of IP-TV.

The company is privately owned by the founders and is based in Linköping, Sweden.
