

## **Agama and Alcatel-Lucent assures Head-end DTV signal quality at Telekom Austria**

**(LINKÖPING, April 22, 2009) – Agama Technologies today proudly announces that Telekom Austria has deployed the Agama Digital-TV Monitoring Solution to ensure the quality at their IPTV Head-end Platform. The business is executed in a partnership and under the lead of systems integrator Alcatel-Lucent.**

Service quality is an important core business value with TV service operators all over the world and the way to stay in control is to implement a service assurance solution. Telekom Austria being a quality aware DTV service provider will be using the Agama Analyzers advanced monitoring capabilities for assurance and monitoring in their Head-end Platform.

*"It is an honour to be selected for a head-end service assurance solution with such a prestigious tier-1 operator in Europe", says Mikael Dahlgren, Managing Director of Agama Technologies. "Winning this project with Alcatel-Lucent proves the versatility of the Agama Solution, that each part of our product portfolio stands well in its own right."*

Powered by unique video/audio stream analyses, the solution enables Telekom Austria to take control of the head-end IPTV streams from the transport to the content layers supporting the Network Operation Department. The Agama solution comes with features that enable improved service quality, increasing customer satisfaction and lowering churn.
